## **ASX Announcement**

**Red Hill South well to spud today -  
28 February 2011**

**Figure 1 Hunt Rig #2 on location at Red Hill South**

**Norwest Energy NL (ASX: NWE)** advises that the Red Hill South – 1 well in the TP/15 Permit expects to spud today.

Redhill South-1 will test the hydrocarbon potential of the late Permian Dongara Sandstone reservoir and which are prolific producers at the Hovea and Jingemlia oil fields. The Red Hill

South prospect has potential of 34MMbbl oil in place and 9MMbbl recoverable. The target reservoir is at a depth of 1,580 meters (TD is at 1,910 meters).

The well is to be drilled by Hunt Energy and Mineral Co Rig 2 from an onshore location in Permit L1 adjacent to Dongara Airport, into the offshore target in TP/15.

Status as of 11.00am WST on 28 February.

1. The final remaining approval for the Application to Drill was received from the WA Department of Mines and Petroleum on 25 February 2011.
2. The Hunt Rig 2 will spud during the course of 28 February.
3. The 13-3/8" conductor casing has been pre-installed.
4. The well will be directionally drilled in 12-1/4" diameter hole to achieve 310m step-out and be vertical at the end of the 12-1/4" section. 9-5/8" casing will then be run to 1202m measured depth (MD). The well will continue in 8-1/2" diameter hole through the target to a prognosed total depth at 1977m MD (1907m vertical depth). See Fig 1 for a well vertical section plot.
5. Following drilling, the well will be logged with a suite of wireline logging tools and evaluated for hydrocarbons. Following evaluation it will either be plugged and abandoned as a dry hole, or in a discovery case the well may be suspended as a future producer.
6. Expected duration from spud to TD is 12.5 days with a further 4 days for evaluation and either suspension or plug and abandonment operations. In the event of hydrocarbons being present this period may be extended with additional evaluation and wireline logging.

In accordance with ASX Listing Rules, Norwest will issue regular updates during the drilling operations on each Thursday, or after completing an important operational phase and/or obtaining an important assessment or result.

The participants in Red Hill South are:

Westranch Holdings Pty Ltd <sup>1</sup>	50%
Bharat PetroResources Ltd	50%

<sup>1</sup>A wholly owned subsidiary of Norwest Energy NL (Operators of the Joint Venture)
